

Step by Step Gel Nails

- 1 . Wash your hands.
2. Push back the cuticles.
- 3, Buff the whole nail with your buffer.
4. Dust of the dust of the nail.
5. Apply primer let dry.
6. Apply layer IBD bond/base gel 1 mm from cuticle and bake in lamp for 90 sec.
7. Apply thin layer colour gel 1 mm from cuticle cap the nail Infront and on the sites and bake 90 sec. Can used orange stick to clean your cuticles and sides of the nail. Why capping nails prevent lifting.
8. Apply again colour gel nail polish bake 90 sec.
9. Used your wipe and wipe liquid and wipe the nails.
10. Buff very lightly on the nails not to hard you can take off the gel polish. If want to you can used top coat and then bake 90 sec. And then buff it if you scared you going to take off the gel polish.
11. Wipe of the dust.
12. Apply top coat ad bake 90 sec in lamp.

NB: You can also used Hard gel after you did apply IBD bonder/base gel. Then apply your colour gels. Just Last longer with Hard gel it's like a builder's gel in bottle only apply thin layer of the hard gel.
